LOLER

These UK Regulations are designed to ensure the safety of lifting equipment, and operations, within the workplace. LOLER places duties on people and companies who own and operate lifting equipment in the workplace.

PSSR

In the UK, these regulations aim to prevent injury from the hazards of relevant fluids and stored energy within pressure systems. They cover the requirements for design and safe use of pressure systems used in the work place.

PUWER

These UK regulations place duties on anyone who owns, operates, or has control over work equipment, ensuring it is safe for use and maintained properly. PUWER applies to a wide range of work equipment and machinery.

COSHH

These UK regulations require employers to manage risks from hazardous substances by preventing or reducing exposure. COSHH covers chemicals, dust, fumes, and biological agents that could harm health.
